

DIABETES CONTROL & AUTOMATION

The application designed to establish greater precision and automation in the day-to-day life of people with Diabetes.

Connect with your device.

Connect to your device so you can get your blood glucose data and automatically record your results.

Check your test results.

You can check your daily records and get a report on how these are being. You can also share them via e-mail.

Configure your parameters.

Set your day-to-day guidelines in the app so it can automatically manage the logs and what you should do in each case.
